

Another aspect to note refers to the team profile set to perform product planning in the company. Clearly, the most qualified and the greater the knowledge of the team on the market and business as a whole, the higher the quality of the final results generated.

ACKNOWLEDGMENTS

Part of this research was developed under Grant 8706/11-5, CAPES Foundation, Brazil. The authors would also like to thank UFSC – Federal University of Santa Catarina (Brazil), and Institut für Allgemeine Konstruktionstechnik des Maschinenbaus, RWTH Aachen (Germany) for their support in this project.
